EXTERNALLY FUNDED RESEARCH PROJECTS :

Soon after my graduation as Civil Electrical Engineer in 1977, I started working as a Field Engineer first and later as a Study Engineer in the Santiago Metro Railways for two years, getting a valuable experience working in a state company. Then, in 1979 I moved to the Electrical Engineering Department of the University of Chile, where I remained until 2019. Beside the teaching duties, I have to apply to different source finding to develop research projects, which include the collaboration of students pursuing their engineering studies, engineers and colleagues.
